

Appendix 3

These directories contain the complete set of figures showing modelled dynamic topography, for the:

- Reference model ('RM') series of runs
- Subduction zone shifted east ('Slab23E') series of runs

Dynamic topography was computed for each of the 42 well locations in the Eromanga and Surat Basins. See Appendix 1 for a Table of model runs and see Appendix 2 for a list of well locations.

Model key is shown below.
